

## **Conductive Composites Announces Opening of New Advanced Materials Production Facility**

**FOR IMMEDIATE RELEASE – Cleveland, UT September 22, 2022**

Continuing a commitment to provide our customers with the most technologically advanced composite materials, Conductive Composites is proud to announce the opening of a new Advanced Materials production facility in Cleveland, Utah. This new 27,000 ft<sup>2</sup> facility is the third facility at this location, and will host industrial scale broad good coaters, fiber converting processes, ready-use product manufacturing areas, and supporting operations and administration. “This new expansion is really a testament to our efforts of creating a wide range of materials and products that directly address our customer’s needs.” stated David Tilton, VP of Business Development. Continuing the company’s commitment to manufacturing in rural Utah, the new facility is designed for future expansion and will run in parallel to existing fiber coating and process gas production plants. “It is really great to see how our technology and company has advanced to this point. This new facility is the culmination of years of work, and we plan to continue to invest and expand our operations at this campus for many years to come” stated Nathan Hansen, CEO.

### **About Conductive Composites:**

Conductive Composites develops and delivers conductivity-based polymer and composite solutions that answer the combined demands of conductivity and shielding performance in lightweight materials systems. Conductive Composites is a division of the Conductive Group. Visit our website at: [www.conductivecomposites.com](http://www.conductivecomposites.com)
